What is a photovoltaic (PV) inverter user manual?

This user manual is intended for photovoltaic (PV) inverter operating personnel and qualified electrical technicians. This user manual is subject to change (specific please in kind prevail) without prior notice. Indicates an imminently hazardous situation which, if not correctly followed, will result in serious injury or death.

How do you connect a PGND cable to an inverter?

Connect the PGND cable before connecting the AC power cables, DC power cables, and communication cables. It is recommended that the ground cable be connected to a nearby ground position. For a system with multiple inverters connected in parallel, connect the ground points of all inverters to ensure equipotential connections.

How to set power limit in Chint Connect app?

Follow the steps below to set parameters. Open Chint Connect APP, and connect to the inverter you used. (See specific instruction in APP Manual.) Find 'Power Limit' manual in Overview page. Choose limit types to enter corresponding parameters. Please set limit values according to actual necessity and relevant local regulation.
