

# How to buy genuine photovoltaic panels

Where can I buy a solar panel kit?

Many people commonly purchase solar panel kits from Amazon that include the majority of equipment necessary for getting a solar panel system up and running (i.e., wiring, solar panels, the inverter, etc.). Most solar panel kits are best suited for smaller applications, such as an RV or boat instead of a home.

Where can I buy solar panels?

For some, buying equipment directly from Amazon or wholesale resellers is the best place to buy solar panels and the most affordable option. For others, a large, national company may be able to provide you with a better deal than you can find on the EnergySage Marketplace. Using the EnergySage marketplace, buying solar panels is easy.

Should you lease or buy solar panels?

Leasing and buying solar panels come with their own unique advantages. Sunrun gives you the option to buy your solar panels. When you own your home solar system, you'll get all the solar benefits. This means solar incentives like state solar rebates, Solar Renewable Energy Credits (SRECs), and the federal solar tax credit will go directly to you.

Should you buy a home with solar panels?

Design a custom solar system and compare quotes online. The back way into buying solar panels is buying a house that already has solar panels installed. According to Zillow, homes with solar panels - and other energy efficient features - sell faster and for more money than comparable homes without.

Should I buy a solar panel system from a large company?

One popular option for installing a residential solar panel system today is contracting through a large solar company, such as SunRun. There are certain advantages to buying a solar panel system from a large solar company.

Are portable solar panels better than off-grid solar panels?

Off-grid solar panels can harness enough power to supply energy for your entire home, while portable solar panels are better for on-the-go solar power usage. Large rooftop solar panels are much more expensive than small solar panels -- they can take decades to completely pay off -- and can only be installed by professionals.
