

How to read the A number of JA Solar panels

What is the difference between JA Solar and standard solar panels?

JA Solar's standard solar modules also come in a 60-cell or 72-cell count. Here is a table to outline the differences in power output and efficiency for these modules: Outside of power output and efficiency, there are a few other features that differentiate these solar modules. JA Solar's standard panels have limited power degradation.

How efficient are JA Solar panels?

From the above tables, you can see that the power output and efficiency of JA Solar's modules are very comparable with the majority of other solar panels on the market. It is very common to see panels around 15-16% efficiency on the low end and 18-19% on the high end, although some solar panels can reach an efficiency of over 21%.

What types of solar panels does JA Solar offer?

The final category of solar panel modules that JA Solar has to offer are the Bifacial Mono PERC Double Glass modules. There are also 4 options within this category -- two 60-cell options and two 72-cell options. Front and Back of JA Solar's Bifacial Modules

What are the electrical parameters used in JA Solar modules?

For the detailed electrical parameter, see the below list: The junction boxes used with JA Solar Modules contain bypass diodes wired in parallel with the PV cell strings. In the case of partial shading, the diodes bypass the current generated by the non-shaded cells, thereby limiting Modules heating and performance losses.
