

How do I Turn on a PV isolator?

Turn on PV isolator switches between the inverter and array and then on the side of the inverter. Make sure Steps 1 and 2 are running properly before turning on the grid power or generator breaker. Power on the load breakers in the cable box of the inverter and then in the load panel.

How to turn on a PV inverter?

Make sure the DC open circuit voltage of input strings is less than 1500V. ) Turn on the AC circuit breaker. ) Turn on the DC circuit breaker. (Skip these two steps if there are no circuit breakers.) ) Switch the DC Switch to the "ON" position. When the energy supplied by the PV array is sufficient, the LED of inverter will light up.

What should I do if my PV inverter is not working?

Ensure the PV string voltage is within the inverter specification. If string voltage is within range and this fault persists, contact your supplier. Load port and grid port are connected wired incorrectly or reversed. Check if the wires on load port and grid port are connected correctly. If the fault persists, contact your supplier.

What happens if a PV inverter fails?

The inverter will be shut down automatically if the PV power generation system fails, such as output short circuit, grid overvoltage / undervoltage, grid overfrequency / underfrequency, high environmental temperature or internal malfunction of the machine. The fault information will be displayed on the APP interface.

What is a Growatt series photovoltaic inverter?

Require to order extra if you need it. Growatt series photovoltaic inverters are used to convert the direct current generated by photovoltaic panels into alternating current, and send it to the grid in a three-phase manner.

How many inverters can a photovoltaic system handle?

The AURORA is capable of handling 2 separate arrays. If the output of photovoltaic system exceeds the capacity of a single inverter, additional Aurora inverters can be added to the system; each inverter will be connected to an adequate section of the photovoltaic field on the DC side and to the grid on the AC side.
