

Photovoltaic panel market

How big is the solar photovoltaic (PV) market?

The market is expected to grow from USD 399.44 billion in 2024 to USD 2,517.99 billion by 2032 at a CAGR of 25.88% over the forecast period (2024-2032). Asia Pacific dominated the solar photovoltaic (PV) market with a market share of 49.16% in 2023. Solar energy is used to convert sunlight into electricity by using photovoltaic effect technology.

What is the global solar photovoltaic (PV) market share?

Geographically, the global solar photovoltaic (PV) market share is divided into North America, Europe, Asia Pacific, the Middle East & Africa, and Latin America. The Asia Pacific region held the major share of the global market. More than 77 GW of solar capacity will be added in the region in 2020.

What drives the solar PV panel market?

In addition, increase in construction projects such as decentralized solar power plants, rural electrification projects, solar power plants on the water body & rooftops, and commercial buildings drive the solar PV panel market across the globe.

Which region dominated the solar photovoltaic panel market in 2020?

Asia-Pacific dominated the solar photovoltaic (PV) panel market with highest share in 2020, in terms of revenue, and is anticipated to maintain its dominance throughout the forecast period. This is attributed to the presence of key players and huge consumer base in the region.

How is the solar photovoltaic market segmented?

The Solar Photovoltaic (PV) Market is segmented by product type, end-user, deployment and geography. By product, the market is segmented by thin film, multi-si, and mono-si. By end-user, the market is segmented by residential, commercial, and utility. By deployment, the market is segmented into ground-mounted and rooftop solar.

Why is the solar photovoltaic market growing?

The government in many countries has imposed stringent carbon emission norms due to which the focus towards the renewable sector is increasing, particularly towards solar photovoltaic generation. This is expected to push this market towards growth during the forecast period. Request a Free sample to learn more about this report.

The global solar power market size was valued at USD 253.69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436.36 billion by 2032, exhibiting a CAGR of 6% during the forecast
