

Residential solar power generation services

How much does a residential solar system cost?

In 2023, the NREL estimated that an 8-kilowatt (kW) residential solar system would cost \$2.68 per watt. However, costs can vary widely from region to region, often depending on local labor rates.

How much electricity does a residential solar system generate?

According to the NYSERDA spokesperson, "the average [New York] residential solar installation can be expected to generate approximately 8,000 kilowatt-hours a year," or about 670 kWh per month. Residential solar panel systems in sunnier, less cloudy environments, such as Southern California, are likely to generate greater amounts of electricity.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

Who is the best solar company in the northeast?

LGCY Power: LGCY Power provides one of the best guided solar consultations and offers detailed online articles covering the solar installation process. The company also partners with Sunrun, one of our picks for top solar companies. **Trinity Solar:** Trinity Solar has served the Northeast for more than 28 years.
