

Shell Solar Power Brazil

Will shell invest \$565 million in solar energy in Brazil?

Royal Dutch Shell plc's (RDS.A) Brazilian affiliate Shell Energy intends to invest \$565 million in renewable energy projects in the nation through 2025, most of which will be solar energy.

What is shell energy Brazil?

Shell invests billions of dollars each year in clean, low-carbon energy generation across the world. Shell Energy Brazil in addition to power contracts, offers simple and inexpensive packages of electricity and gas, LNG and environmental offsets for carbon emissions that cannot be avoided.

Does shell have a CAPEX for solar energy projects?

Most of the capex is related to solar energy projects, the executives said. The head of renewable development for Latin America, Gabriela Oliveira, said Shell has 2GW of solar energy projects under development and expects to reach 5GW by year-end.

What does Shell do in Brazil?

It is an integrated energy company and leading producer of sugar cane, ethanol and bioenergy in Brazil. It has 26 production units, 860,000 hectares of cultivated agricultural land, a network of more than 7,300 Shell retail stations, 1,300 Shell Select convenience stores and more than 4,000 business customers in Brazil and Argentina.

How many solar projects does the oil and gas supermajor have?

Currently, the oil and gas supermajor has six solar projects with a total capacity of more than 2 GW including a collaboration with the local steelmaker Gerdau SA to construct a 190-MW direct current solar project in the state of Minas Gerais.

Who owns Shell lubricants?

The Shell-branded retail sites and lubricants business in Brazil and Argentina will continue to be managed by Raízen. 1 Raízen produces first generation ethanol from sugar cane, and it is also the only company in the world to produce second generation ethanol on a commercial scale, reusing bagasse, the fibrous by-product of sugar cane production.
