

What is the photovoltaic panel process warranty

What is a solar panel warranty?

Solar panel warranties vary by manufacturer and type of panel. A standard solar panel warranty should come with at least 10 years of protection. Solar panel warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment.

What should I look for in a solar panel performance warranty?

Ideally, you should look for a solar panel performance warranty with the following conditions: Some solar manufacturers will guarantee a degradation rate as low as 0.25% per year, and a performance warranty period of up to 30 years. The best solar companies offer homeowners an installation warranty of their own.

What happens if a solar panel fails within the warranty period?

If a panel fails within the solar panel warranty period, the manufacturer needs to fix it, saving you significant money, and sometimes, it can be thousands of dollars. Also, manufacturers are more likely to produce high-quality solar panels if they know they must stand behind them with solar warranties.

Can a solar panel warranty be voided?

For example, warranties may be voided if the solar panels are not installed according to specified guidelines or if unauthorized modifications are made. Certain solar panel warranties might not cover fire damage or other outside sources.

Are solar panel warranties transferable in a home sale?

In most cases, solar panel warranties are transferable to the new owner in a home sale. However, some warranties are restricted to the original owner, so it is crucial to clarify this point with the manufacturer and installer offering the warranty.

Does Panasonic offer a warranty on solar panels?

Panasonic is a top-runner in the solar panel industry. The Japan-based company offers its AllGuard and Triple Guard warranty plans to homeowners who go solar through a Panasonic Authorized AllGuard Installer.
